Cortaflex® - The UK's No. 1 Joint Supplement

"Showjumping is very demanding on horses joints, especially on hard ground. I use and recommend Cortaflex because it has clinical evidence, has stood the test of time and, more importantly, I have seen and felt the difference it has made to many of my horses."
William Funnell & Cortaflex Mondriaan -
Winners of the Hickstead Derby 2006

"I use Cortaflex because I believe it's the best joint supplement on the market."
Zara Phillips

"I use Cortaflex as standard for the older horses in work, and the younger horses benefit from So-Kalm when they first start competing." Robert Smith

"I used Coff-Less and Emune on Limestone Lad when he was coughing - he soon stopped." Michael Bowe

"I use ProPell Plus throughout the whole yard, its an integral part of all the horses diets and a major contribution to their well being. I also maintain all my horses on regular Cortaflex and use the Cortaflex HA when I am competing. I am proud to be associated with a company that produces such high performance products." Tim Stockdale

"Dressage is all about flexibility and power. When it comes to management, attention to detail and quality is the key - that's why I use Cortaflex HA.....
I think the results speak for themselves."
Richard Davison

"Having tried several well known joint supplements on a horse that was proving difficult to train, we had decided that we could help him no more. Mary Bromiley, the well-known physiotherapist, suggested that we should try liquid Cortaflex. Amazingly it worked and the horse went on to win eleven of his twenty-two races mostly in Listed and Group Company. I have been using liquid Cortaflex routinely ever since." Marcus Tregoning

"I have found Cortaflex to be a great aid for joints. Many of my horses are on it, including Hedgehunter". Willie Mullins, trainer of Hedgehunter -Winners of the Grand National 2005.

"Since I started using Cortaflex three years ago on my international horses their results have significantly improved! I swear by Cortaflex and now use it on the whole yard!"
Ellen Whitaker

"Detroit City's action has improved greatly since we put him on Cortaflex."
Philip Hobbs

"After getting such outstanding results with Cortaflex HA I decided to try U-Gard on a couple of horses. Their appetites and overall appearance improved dramatically, I now use both of these products on a regular basis."
Peter Bowen

"Collier Hill would not be where he is now without Cortaflex, simple as that."
Alan Swinbank

Cortaflex® – For Healthy Joints

Constant pounding on artificial, hard or heavy ground is very demanding on joints - even hacking can cause abnormal wear and tear. Feeding a proven joint supplement can help to redress the balance and support healthy joint function.

Chondroitin, Glucosamine Or Cortaflex®?

Facts about joint cartilage

Joint cartilage is not directly connected to any blood vessels so, all of the nutrients that the cartilage needs for good health have to be small enough to pass through cellular walls to benefit the joint tissue.

The Cortaflex® Difference

Cortaflex® was formulated around the theory that smaller molecules are more likely to be absorbed through cellular walls than larger ones and, therefore, contains the micro sized

Beyond Chondroitin & Glucosamine

Larger Chondroitin & Glucosamine molecules

Larger molecules are less likely to pass through tiny cell walls and into the joints.

The smaller key active isolates of Chondroitin & Glucosamine

Smaller molecules are more likely to pass through tiny cell walls and into the joints.

key active isolates of Chondroitin and Glucosamine. Cortaflex® should not be confused or compared with the many joint supplements that rely on the larger sized Chondroitin and Glucosamine molecules. These supplements generally state that it may take several weeks before there is any improvement in joint mobility. By contrast, The Horse Journal reported that horses on Cortaflex® showed dramatic results in as little as three days!

"After oral dosing, the mean bioavailability was 2.5%. Determination of bioavailability after dosing to horses provides evidence that glucosamine is absorbed orally, albeit low."

The bioavailability and Pharmacokinetics of Glucosamine Hydrochloride and Chondroitin Sulphate after Oral and Intravenous Single Dose Administration in the Horse.

Jianping Du et al.

The bioavailability of the higher molecular weight Chondroitin Sulphate was between 22% and 32%.

Taken from the Oral Absorption of Chondroitin Sulphate as determined by Total Disaccharide Content After Oral and Intravenous Administration to Horses.

Natalie D. Eddington et al.

Visual diagram of the Cortaflex® formulation hypothesis

Cortaflex® and Hyaluronic Acid

Cortaflex® is now fortified with Hyaluronic Acid (HA) for even greater benefit to the joints, particularly those that have experienced excessive wear and tear.

HA is a major component of synovial fluid which is essential for providing the joints with lubrication and the cartilage with nutrients. HA has traditionally been derived from type II Collagen sourced from Rooster Comb, which has a high molecular weight of up to six million Daltons. This form of HA has been shown to be very effective when injected,

but is not considered to achieve a good rate of absorption when taken orally due to the large molecular size. The Hyaluronic Acid used in Cortaflex® is of vegetable origin and has a molecular weight of less than fifty thousand Daltons. It is believed that this is more readily absorbed, providing Hyaluronic Acid to the joints in a non-invasive way.

Clinical evidence separates the innovator from the imitator.

Clinical Study

Cortaflex® is the only equine joint supplement to have been clinically proven in a double blind study of equine tarsal joint movement. The rigorous trial was conducted by the College of Veterinary Medicine at Michigan State University, one of the leading equine research institutes in the world. Unlike the more subjective research approaches in the majority of equine trials, the study used the most

advanced kinetic analysis techniques to objectively and accurately measure the improvement in the horses gait. These techniques, based on video and force plates, unquestionably proved the improvement in gait asymmetry. The results were then presented by the author Dr. Hilary Clayton BVMS, PhD, MRVCS, to the A.A.E.P (American Association of Equine Practitioners) and published in the conference proceedings.

"I have been recommending Cortaflex for 10 years in any case involving joint stiffness because it has stood the test of time and remains, in my opinion, the best joint supplement on the market. Cortaflex has now been fortified with Hyaluronic Acid, which means that the isolates contained in the Cortaflex formula provide all the key nutrition for cartilage function and repair, whilst the HA component stimulates high quality joint fluid that lubricates the articular surfaces to reduce wear and tear damage"

Dr David Platt BVSc., PhD., DEO., FRCVS,
RCVS Diplomat in Equine Orthopaedic Surgery, Consultant Equine Surgeon

Cortaflex® HA Powder & Solution.

Made stronger to last longer

To celebrate Equine America's 10th Anniversary Cortaflex® HA has been re-formulated. Twice the value – up to two-month supply!

1 Cortaflex® HA Solution and Powder

High strength Cortaflex® with Hyaluronic Acid

It's never too late! Specially formulated for competition horses and ponies, and for those with excessive wear and tear to their joints. Feed 30ml (solution) or 15 grams (powder) for maximum benefit and 15ml or 7.5 grams as a maintenance level.

Available in Solution – 946ml (up to two month supply), 3.8ltr and 20ltr and in Powder 450 gm (now up to two month supply) and 4.5kg.

2 Cortaflex® HA Paste

Concentrated Cortaflex® HA in an easy to administer 3 day paste, ideal as a pre-competition boost.

“To keep my team sound and supple I run them on Cortaflex HA Liquid and maintain them on Cortaflex Powder, and for myself I take Cortaflex capsules.”
Pippa Funnell.

3 Cortaflex® Powder

It's never too soon! Fortified with Hyaluronic Acid, Cortaflex® Powder economically and effectively supports and maintains healthy joints for each and every horse and pony throughout their life. Combined with Better Bones (page 7), Cortaflex® Powder will ensure a sound joint and bone structure for both young and old animals.

Available in 227gm (a one month supply at maintenance), 454gm, 908gm and 3,6kg. From as little as 38p per day.

4 **Better Bones** - for strong, healthy dense bones

The sooner you feed Better Bones the better! Give your horse the best possible start and strong bones for life. Combine Better Bones with Cortaflex® for the ultimate in joint and bone care.

"Due to modern agriculture our land is now deficient in vital minerals. Because of this, we are producing muscle bound horses on weak skeletons. Better Bones has been specially formulated to address this issue with a combination of Silicon, Dicalcium Phosphate and Magnesium."

Mary Bromiley, the renowned equine physiotherapist.

Available in 3.5kg (62 day supply).

5 **Buteless® High Strength (not Phenylbutazone)** - a powerful natural alternative

Twice the value – up to two-month supply

New – Buteless® High Strength can now be fed effectively at 15ml, representing even better value for money. Buteless® High Strength, is a natural and palatable formulation, containing a potent combination of Botanical Extracts. Can be used effectively in combination with Cortaflex® for long-term concerns.

Available in 946ml (a two month supply at maintenance) and 3.8 ltr.

Also available – Buteless® 30ml paste (three servings).

6 **So-Kalm Plus®** - with added Magnesium

All horses have some degree of nervousness while being prepared for exercise and during competition. Some are so highly strung that they “wash-out” before competition, preventing them from giving their best. The amino acids, premium grade magnesium and Vitamin B1 in So-Kalm Plus® will relax your horse without removing the “edge” required for competition. So-Kalm Plus® can also be fed daily to difficult horses at home, or when training young, nervous or excitable horses.

Available in 908gm (a one month supply at maintenance) and a 30ml paste (three servings).

7 V-Biotic® - more than just a feed balancer!

Super concentrated V-Biotic® has been specially formulated to provide the balanced mix of essential vitamins and minerals that your horse or pony needs, and which may be lacking in their domestic diet. Additionally, V-Biotic® contains Echinacea for the immune system, Turmeric for a healthy liver, highly effective probiotics and powerful anti-oxidants, and the very best ingredients to support bone, hoof and muscle tissue and benefit the circulatory system. V-Biotic® can help maintain vitality in the older horse and is essential, alongside Lamigard®, to the diet of a horse or pony prone to Laminitis. When added to a restricted diet, V-Biotic® will ensure the key nutritional requirements are met without the concern of protein or carbohydrate overload.

Available in 908gm (a one month supply) and 3.2kg.

8 Lamigard® - fast & effective

Lamigard® is formulated for the horse or pony prone to Laminitis, containing powerful antioxidants to help mop up excess free radicals which settle in the feet. Lamigard® is highly effective in supporting a healthy enzyme level within the hooves and providing nutrients to the internal sensitive structures, as well as promoting external hoof wall growth and condition. Lamigard® is extremely effective but very gentle on the rest of the system and can be fed to the in-foal mare. For horses and ponies prone to Laminitis and on a restricted diet, we advise feeding V-Biotic® alongside Lamigard®, to ensure that key nutritional requirements are met.

Available in 454gm (a two month supply at maintenance for an average pony) and 908gm.

"I am always very cautious about these types of products, but I have found Lamigard to be outstanding."

*Dr David Platt BVSc., PhD., DEO., FRCVS,
RCVS Diplomate in Equine Orthopaedic Surgery,
Consultant Equine Surgeon*

9 ProPell Plus® - Iron rich vitamin & mineral tonic

If your horse is lacking in energy and sparkle feed ProPell Plus® – an Iron rich Vitamin and Mineral tonic fortified with Echinacea to support red blood cell production and the immune system - great for hardworking and competition horses.

Available in 946ml (a one month supply at maintenance) and 3.8ltr.

10 Hoof Power Plus® - for strong healthy hooves

Hoof Power Plus® is a highly effective daily supplement to ensure optimal horn growth, improving hoof condition in weeks. It contains the very best quality ingredients, including a generous 25mg of Biotin per 14 gram serving, as well as Zinc, Methionine, Vitamin B6, MSM, Yeast Cultures and Seaweed -making Hoof Power Plus® a powerful complete supplement.

Available in 454gm (a one month supply) and 908gm.

“I was very pleased by the effects of Hoof Power Plus. I used it on my mare for one month, and I have to tell you I was amazed. The top 2 cm of her hooves grew vigorously and looked and felt strong and healthy. Hoof Power Plus is the first and only hoof supplement I will recommend to my clients and use for my own horse.” Hanne Engstrom, MRCVS.

11 U-Gard Plus®

A calcium based supplement containing neutralising alkaline agents to gently soothe and coat the stomach lining, making it ideal for horses under stress, on high grain diets or that have a sensitive stomach. Key ingredients in U-Gard Plus® include Liquorice, Aloe Vera, Calcium Carbonate, Kaolin, Iron Oxide, Dried Apple Pectin Pulp, Magnesium Silicate, Vitamin B5 and Magnesium Oxide. In a trial on non-prescription alternatives to Gastrogard, the Horse Journal said "U-Gard is our first choice"

Available in 1.6kg (a 40 day supply at maintenance).

12 Coff-Less

Coff-Less is specially formulated using herbs and natural ingredients including Fenugreek Seed Powder, Kelp Meal, Garlic Powder, Gentian and Mullein Extract for healthy lungs and respiratory system. Coff-Less also contains Glycerine to soothe and lubricate the throat, Oil of Eucalyptus to clear the airway and Echinacea to support the immune system.

Coff-Less can be used when needed or permanently for horses and ponies that have a sensitivity to dust and mould spores found in the air, hay and bedding.

Available in 908gm (a two month supply at maintenance).

13 Drink More

Many horses drink less when stabled away from home or being transported on long journeys to and from competition and, therefore, become dehydrated and under perform. Drink More is specially formulated to encourage horses to drink, aiding normal levels of hydration.

Available in 473ml (31 x 15ml servings).

14 Tye-Gard® – for healthy muscle function

Formulated for horses on highly nutritious diets which are performing strenuous exercise and prone to muscle soreness. Tye-Gard® solution contains highly absorbable human grade Vitamin E and Selenium to promote healthy muscle function and lactic acid levels.

Available in 946ml (a two month supply at maintenance) and 3.8ltr.

“I use Tye-Gard on horses within my care, I believe it is the best product of its kind on the market.” Henrietta Knight

15 Apple Lytes - ‘The’ electrolyte for your horse or pony

A special preparation of micro blended, fruit scented mineral salts to assist re-hydration and replenish vital body fluids and electrolytes after strenuous exercise. Apple Lytes is highly soluble and can be given in the feed or mixed into the drinking water without sinking. Apple Lytes was formulated by Bruce Snipes, creator of Cortaflex®, who pioneered the feeding of electrolytes to horses in the 1960’s.

Available in 1.8kg (a one month supply at maintenance), 6.8kg, 13.6kg and a 30ml paste (two servings).

16 HerBolic® – for high performance

A powerful, fast acting herbal supplement for horses needing to achieve their highest performance level. HerBolic® contains Vitamin B12, Ribose, Passiflora Caerulea, Puncture Vine Root and Rutin to encourage appetite and healthy muscle tone, helping the horse to have the attitude and keenness to win!

Available in 946ml (a two month supply at maintenance).

17 Hormosol – a must for moody mares

Hormone imbalances can lead to poor performance, sensitivity and mood swings. Hormosol is a liquid Chaste Berry supplement to naturally maintain a healthy hormone balance in mares and stallions.

Available in 946ml (a month supply).

18 More Muscle – transform your horse in a month

More Muscle is a powerful liquid Gamma Oryzanol supplement for optimal muscle capacity and condition. More Muscle is ideal when preparing for the show or competition season and for preparing young stock for the sale ring - condition can then be maintained using V-Biotic®.

Available in 946ml (a two month supply).

19 Shaker Gard

Shaker Gard is formulated to provide head-shakers with an intricate mix of minerals and powerful anti-oxidants to vitalise the nervous system. Also beneficial for seasonal shakers.

Available in 908gm (a two month supply at maintenance).

20 Emune®

Contains powerful extracts of Echinacea and Astragalus – highly effective in maintaining a healthy immune system particularly at times of stress.

Available in 946ml (a one month supply).

21 Hemogen -**Setting new standards for blood tonics!**

Most blood tonics marketed today contain only a few ingredients responsible for red blood cell production. This is where Hemogen is unique; every ingredient is active and water soluble, allowing each nutrient to be utilized for optimum energy and stamina levels. Key ingredients include Iron, Vitamin B12, Riboflavin, Vitamin E and Thiamine, along with Copper, Cobalt, Selenium, Glycine, Niacinamide and Pyridoxine.

Available in 946ml (a one month supply at maintenance).

22 Hemo-flex

Cortaflex®, Tye-Gard® and Hemogen all condensed into one product! Hemo-flex is the ultimate competition supplement for joints, muscles and blood.

Available in 946ml (a one month supply at maintenance) and 20ltr.

23 Xtra Boost

A combination of rapidly absorbed B vitamins for an extra boost to energy. Use as a three-day build up for a show or event to maximise performance.

Available in 30ml paste (3 day course).

24 Bleader Gard®

Supports the lungs and blood vessels for the optimal capacity required for strenuous work, whether in short bursts or over longer periods of time. Without Bleader Gard®, performance can be badly affected.

Available in 908gm (a two month supply at maintenance) and a 30ml paste (three servings).

25 Kentucky Joint Supplement

Contains 10,000 mg of 99% pure Glucosamine Hydrochloride per 10 gram serving.

Available in 500gm (a 50 day supply) £19.99 RRP

26 Glucosamine 10,000 plus MSM

Contains 10,000 mg of 99% pure Glucosamine Hydrochloride plus 1650mg of MSM per 30 gram loading serving. Feed 30 grams for 30 days and then maintain on 15 grams.

Available in 900 gm (a 60 day supply at maintenance) £13.99 RRP

If it's Glucosamine you want then compare the strength, purity and price to any other Glucosamine product on the market - why use anything else? But if you want the best for your horses joints then we advise you to use clinically proven Cortaflex®.

27 Dye Retic

A unique blend of herbs to support the horse in the maintenance of a healthy balance of fluid within the body. Dye Retic is a palatable solution containing Juniper Berries, Uva Ursi and Buchu.

Available in 946ml (31 servings).

28 Airways®

Airways® is a pre-event mouthwash to encourage maximum air intake essential for optimal performance over the duration of the competition. Airways® contains the natural ingredients Vinegar, Honey, Glycerine, Eucalyptus and Peppermint to lubricate the throat and dilate the airways.

Available in 473ml (31 servings).

29 Sand-Out

A digestive aid for horses and ponies grazing on sandy pastures. Sand-Out contains multi-active fibre (Psyllium Husk) that encapsulates dirt and sand particles, supported by effective system lubricants, helping sand and dirt to pass through the digestive system. Sand-Out is non-abrasive and gentle.

Available in 1.75kg (2 month course).

30 Progest-WT

An effective pro-biotic weight gain supplement for horses of all ages and activities, containing yeast cultures to encourage the efficient utilization of food.

Available in 908gm (a month supply at maintenance).

Equine America specialises in preparing nutritional supplements to assist performance and recreational horses and ponies of every age. These products are blended from the highest quality ingredients to achieve a nutritional balance for maximum benefit. On this page, there are also five specialist products which your veterinary surgeon may recommend for your horse.

If you have any questions or queries on these or any of the products in the range, please call the Equine America Advice Line on 01403 255809.

- 31 Thiamine B1**
Available in 3.8ltr (4 month supply).
- 32 Vitamin C**
Available in 908gm (64 day supply).
- 33 Vitamin E & Selenium**
Available in 908gm (64 day supply).
- 34 Copper-Plus**
Available in 908gm (45 day supply).
- 35 MSM (Methylsulphonylmethane)**
Available in 908gm (4 month supply at maintenance).

36 Horse Spray

An effective coat conditioner containing Lanolin and Aloe Vera with essential oils including Citronella, Eucalyptus and Cedar Wood. Horse Spray will leave your horses coat and skin healthy and supple with a pleasant aroma.

Available in 946ml.

37 Like Ice®

Sorboplex™, the special ingredient in Like Ice®, begins working on contact to tighten and cool hot, tired legs after strenuous exercise. The 24-hour kaolin base cools the leg, while Aloe Vera and Melaleuca soothes and moisturises. Like Ice® rinses off easily, making it ideal for the busy yard.

Available in 2.7kg and 11kg.

38 Equi-Lin

An invigorating, aromatic solution containing Menthol, Oils of Cedarwood, Worm Wood, Spike, Thyme and Rosemary. Equi-Lin, when mixed with water, creates a stimulating and refreshing ‘all over’ wash for muscles and limbs following strenuous exercise. Contains no Camphor.

Available in 3.8ltr.

39 Green Ice Gel

A soothing, cooling, easy to apply gel for ‘tired’ limbs.

Available in 1.9ltr.

40 Sore No-More

Voted “Best All Purpose Liniment” by the Horse Journal, to soothe and relax tired ligaments, muscles and tendons. Used by international physiotherapist Mary Bromiley and by top professional riders. Effective, gentle and safe for sensitive skins.

Available in a 473ml spray bottle.

41 Derma Gel

The number one herbal skin hydrogel, for intensive and rapid skin care, plus a protective barrier effective against foreign contaminants. Derma Gel provides and maintains a moist epidermal environment with the ability to help clean and deride necrotic tissue, encourage natural hair re-growth and maximise skin smoothness.

Available in a 50ml spray and a gel in a unique 100 ml pump dispenser, which keeps Derma Gel free from contaminants and spillage.

Derma Gel does not contain steroids and is completely safe to use on a mare in foal and competition horses.

42 Itchnomore

For horses and ponies prone to itching. Itchnomore can be applied directly to one area or diluted to create a soothing all over wash. Itchnomore soothes irritation, reduces scurfy skin and encourages healthy hair condition - apply every other day for maximum benefit.

Available in 300 gms.

43 Blackdraw

Blackdraw, containing Ichthammol, can be used as a topical application or hoof draw. A favourite with farriers and vets in the U.S.A.

Available in 400gm.

44 Miracle Hoof Grow

A topical preparation for helping promote rapid growth of horses hooves. Use along side Hoof Power Plus® for optimal horn growth and condition.

Available in 156 grams.

The Fungatrol Range

The effects that exposure to rain and mud can have on a horse's legs and back are distressing and often very painful. To avoid these problems can mean keeping horses in all winter, but not any more - thanks to The Fungatrol Range! The Fungatrol Range, with its powerful anti-bacterial and anti-fungal ingredients, will protect and condition your horses skin, coat and hooves all year round, combining potent ingredients with a gentle action for amazing results.

45 Fungatrol Leather Soap

This easy to use spray saddle soap cleans, softens, conditions and preserves leather. Fungatrol Saddle Soap contains anti-fungal and anti-bacterial agents to reduce germs passed from one horse to the other via tack and also stops mould from building up when tack is unused. **Available in 946ml spray.**

46 Fungatrol Shampoo

Washing with water alone can strip the skin of its natural protective oils - Fungatrol Shampoo can be used to wash the whole horse or individual areas, protecting the skin from bacteria and fungus. This powerful lathering shampoo is a great start to the Fungatrol programme. For best results, leave on for 20 mins before rinsing. **Available in 473ml.**

47 Fungatrol Cream

After the legs have been washed with Fungatrol Shampoo and dried thoroughly, smear Fungatrol Cream all over the area to create a waterproof barrier, which conditions and protects the skin from bacteria and fungus. **Available in 150ml and 400ml tubs.**

48 Fungatrol Spray

A 'leave on' water-based spray containing anti-fungal and anti-bacterial ingredients with added coat conditioners. After washing the horse with Fungatrol Shampoo spray all over to maintain healthy supple skin. **Available in 360ml.**

49 Fungatrol Hoof Dressing

'Goodness not gloss' – a hoof dressing that conditions the hoof and encourages healthy growth, while allowing the foot to breathe and absorb water naturally. Provides an anti-fungal and anti-bacterial barrier for all year round hoof protection.

Available in 473ml.

50 Sheath Cleaner

The natural solution for thorough cleansing of the mare and stallions genitals, and between the teats of the mare's udder.

This specially pH balanced formulation of Australian Tea Tree Oil and gentle cleansers is ideal for routine washing and removal of accumulated body oils and dirt. Ideal for use on the mare or stallion at stud.

Available in 473ml.

Shampoo

Equine America offers a range of shampoos to cater for every need - all are rich lathering and gentle on the skin as well as being kind to the pocket.

All Shampoos available in 946ml and 3.8ltr.

51 Citronella Shampoo

A fragrant shampoo with citronella oils which is gentle on the skin and will leave your horse with the aroma of lemon zest.

52 Tea Tree Shampoo

With Melaleuca and Aloe to soothe and moisturise, ideal for horses and ponies prone to sensitive skin.

53 Equine Shampoo

For head to toe cleaning at great value for money.

Super Groom

The Super Groom range provides the best quality products for the ultimate grooming kit. Ideal for show preparation or every day use to ensure you have the smartest horse in the yard!

54 **Super Groom Mane & Tail Magic Sheen**

For a shiny tangle-free mane and tail and a conditioned coat with a show ring shine. A professional product at an affordable price.

Available in 946ml.

55 **Super Groom Waterless Grooming**

Removes stains and highlights white markings – producing show ring shine without washing. Super Groom Waterless Grooming is a non-silicon, non-slip, non-static formula, making it an ideal 'all over' grooming aid.

Available in 473ml.

56 **Super Groom Whitening Shampoo**

A whitening and colour enhancing shampoo with optical brighteners, moisturisers and conditioners that naturally highlight the coat, bringing out the brilliance in light coloured coats, leaving white socks whiter than white, and darker coats with a deep rich colour.

Available in 473ml.

57 Equiwrap

Equiwrap tears cleanly by hand, will not constrict, does not stick to skin or hair, will not shred and stays in place under the most adverse conditions.

Available in a wide range of colours including fluorescents.

**58****Flair Equine Nasal Strips**

A breath of fresh air - Flair Nasal Strips maintain the horse's airflow when it needs oxygen most. Flair can also help to reduce muscle fatigue, improve recovery after physical exertion and reduce pulmonary stress.

Available in single strips or economy packs of 6.

Inflamex *The natural alternative for dogs*

Inflamex is a natural alternative with no known side effects. It is a potent combination of Devil's Claw and Yucca which can be used in the initial stages of feeding Canine & Feline Cortaflex® or when extra help is needed. Inflamex can also be used permanently alongside Canine & Feline Cortaflex® for geriatric dogs or long term concerns.

Available in 473ml.

Canine Pro-Pell®

An Iron rich liquid dietary supplement to ensure your dog is receiving the necessary vitamins and minerals for health and vitality. (Also suitable for cats)

Available in 946ml.

Are you feeding your dog or cat Chondroitin or Glucosamine?
....and do they still have joint discomfort?

Then it's time to feed Cortaflex® now!

Cortaflex® is a unique formulation of the smaller key
active isolates of Chondroitin & Glucosamine

See the difference in days!

Canine & Feline Cortaflex® nutritionally supports the health of every joint in the body, providing nutrients for lubrication and flexibility of movement. Based on the clinically proven formulation that has taken the equine world by storm, Canine & Feline Cortaflex® is the ultimate joint supplement for your dog or cat.

Wear and tear can also be exaggerated by breed conformation and growth spurts. Feed young animals, especially those breeds with associated weaknesses, Cortaflex® as part of their daily routine to support healthy joints for life.

Premium Range -

Recommended for joints that have experienced excessive wear and tear, very old animals, working dogs or as a 'kick start' to Canine & Feline Cortaflex® Joint Care. Available in capsules, liquid and powder to suit your dog's individual taste. Dramatic results usually seen in 3-7 days.

Canine & Feline Cortaflex® Joint Care -

To prolong joint mobility, feed Cortaflex® Joint Care sooner rather than later - even 6 months old isn't too early to start. A 160 gram container will last the average dog 120

days, but Cortaflex® Joint Care is more than just a maintenance product. It is also recommended for general care or the management of stiff joints, or to maintain condition after using the Premium range above.

"I am writing to say how wonderful Cortaflex is. I've been giving my 15 year old lab Cortaflex and I have now weaned him off all of his tablets. I will be telling all my dog owner friends about it."

Mrs. Julie Goodwin and Buster

"We had tried everything for our German Shepherd - it really upset us to see her in so much discomfort. Then I started her on Cortaflex and couldn't believe it. Within two days she was picking up her toys and wanting to play just like a pup. Now she is back chasing the tractors and running with the kids!" Deborah Hollingsworth.

All of the Cortaflex® products in the Canine & Feline range have been formulated with Hyaluronic Acid, a major component of joint lubricating fluid - for flexible joints!

Taking Chondroitin and Glucosamine? ...and still have joint discomfort ?

Then take **CORTAFLEX®** **HA... NOW!**

...and feel the difference in days!

Used by Premier League Football Clubs

Based on the same clinically proven formulation that has taken the equine world by storm.

"I started taking Cortaflex, and halfway through my first container I was very satisfied. Instead of buying another right away, I was foolishly persuaded by an advert in a daily paper to purchase some less expensive tablets promising much higher levels of Chondroitin and Glucosamine. After 2 months, I was so disappointed that I went straight back on to Cortaflex. I have been using Cortaflex ever since and I am absolutely delighted. So a very big 'thank you' to Cortaflex and I will NOT go for anything that seems a bargain again." Paul Bellamy.

"As a vet I am the ultimate sceptic. However, after taking Cortaflex, I was totally amazed how well I felt - overnight! I have taken Cortaflex since, and it is my intention to carry on with it in the future." Peter Scott Dunn L.V.O. M.R.C.V.S

Regular 60 x 200mg
Capsules

HA 30 x 400mg
Capsules

Cortaflex® Regular (60 X 200mg) Capsules - take daily to nutritionally support the health of every joint in the body, providing nutrients for lubrication and flexibility of movement. Cortaflex® HA (30 x 400mg) Capsules - take daily as an initial part of the Cortaflex® Regular programme, or permanently for those joints that are under stress or that have experienced excessive wear and tear.

So what makes Cortaflex® so much more effective?

Cortaflex® does not rely on the larger Chondroitin and Glucosamine molecules but is a unique formulation of the smaller key active isolates of Chondroitin and Glucosamine. These smaller molecules are considered to be efficiently absorbed in high levels. Latest equine research has shown that only 2% of Glucosamine given orally was absorbed through the digestive tract. Cortaflex® HA is also fortified with a vegetable sourced Hyaluronic Acid for an extra boost to joint fluid, maximising the joints shock absorbing properties.
